Are you fed up with paste-up? Here's a better way.

With the Comp/Set 4800 terminal, what you see is what you set. You can compose complex layouts without preliminary mark-up or time-consuming paste-up. Because you'll see your copy on-screen in its actual size and position.

The Comp/Set 4800 terminal is easy to use. All you do is type in the copy as you would on a typewriter. Then, to make type bigger or smaller, or to move the words around, just press a key. You'll actually see the letters change size and position instantly.

When the layout on the screen is the way you want it, your work is done. The system automatically translates your design into typesetting codes and records the information on a floppy disk. Just insert the disk into your Comp/Set or Comp/Edit phototypesetter and it sets the type just the way you arranged it on the screen.

Now your job is ready to go. Designed and produced with little or no paste-up.

Call us toll-free today to find out about our fast, easy Comp/Set 4800 terminal. We'll send you our copyfitting calculator, a timesaving tool worth $25., absolutely free. Call (800) 631-8134, except in Alaska and Hawaii. In New Jersey, (201) 887-8000, extension 666.

The type for this ad was entirely composed on the Comp/Set system.
